## Night bbbox Delivery

## What is Night bbox Delivery?

Night bbox Delivery is an overnight service from bpost that ensures parts, tools and materials are delivered **before 7am** to a **bbox** locker located in a convenient spot : close to a customer adress, en route to a customer, or near one of the company's sites.

This service is part of bpost's broader Night Delivery offering, which also includes deliveries to vans, construction sites and other secure zones. The bbox option adds extra flexibility, with accessible delivery points across a wide range of locations.

## Who is this service for?

Early deliveries are essential in sectors where every minute counts. In many companies, technicians need to collect parts from a warehouse or depot before starting their working day.

This creates delays and extra travel time, as well as inefficient planning. However, by delivering before 7am at a location that fits better with the technician's route, their workday can begin immediately, without any detours.

## Night bbox Delivery

Delivery is ideal for businesses:

With technicians and service staff on the road from early in the morning that rely on timely deliveries to start their operations where parts or materials are typically collected from a central warehouse, costing valuable time already using on-site or in-vehicle deliveries but seeking greater flexibility.

## Relevant sectors include:

- Industry & machinery
- Automotive
- Energy & utilities
- Building systems & elevators
- Security & telecoms
- ICT & hardware support
- Facility services

## What are the benefits ?

### **More productive hours**

No more time lost wasted collecting parts from a depot. With deliveries before 7am, staff can start work immediately with the right equipment at hand. That's time saved per technician, per every day.

### **Lower cost per intervention**

Fewer detours mean less reduced fuel costs and more billable hours. Your team spends less time travelling and more time working.

### **Lower CO<sub>2</sub> emissions**

Every kilometre saved lowers your carbon footprint and supports your sustainability goals.

### **Late cut-off, early delivery**

Parcels collected by 6pm are delivered the next morning, so your team can start the day fully equipped.

### **No fixed location required**

With bbox lockers near key routes or customer sites, your technicians do not need to visit a specific depot.

# Night bbox Delivery at a glance

- ✓ **Collection:** Available on weekdays until 6pm.
